

We have a complete line of portable restrooms that are sanitized, modern, and clean. They range from standard to high-end units, including mobile restroom trailers that feature running water for flushing and hot and cold fresh water for washing hands.

We offer specialized portable restrooms, including wheelchair accessible, equipped portable restrooms, units for high-rise building projects, and holding tanks for under job trailers.

Our portable restroom trailers are perfect for large gatherings and special events, especially outdoor weddings.

Our wedding portable restroom trailers come with two to three restrooms and have many of the comforts and conveniences of home. They offer fresh water, soap and hand towels for washing your hands, and feature flushing toilets too. There are four different portable restroom units; the Porta Lisa, Eltia, the Comfort Elite and the Super Deluxe. Eltia offers upscale elegance and fashionable amenities, including porcelain fixtures, skylights and full-length mirrors in an open space design. Like Eltia, the Super Deluxe, our 18 foot trailer, has heat, air conditioning and features private restroom stalls.

- **Drain Cleaning**
- **Line Opening**
- **Water Line Replacement**
- **Plumbing Upgrades**
- **Locating Water, Sewer and Electric Lines**

Septic tank pumping (cleaning) and Repairs

We offer a 14 point check list at no additional charge for residential septic pumping, and we guarantee that we'll find your septic tank location.

Our Septic system repairs also include repairing septic sand mound effluent pumps. Additionally, we also use a proprietary "confined space" technique, to get into septic tanks after they've been cleaned, to perform repairs from the inside when necessary.

Note - a residential customer should never put in a new septic system, without first getting options from Associated. Although we don't install new septic systems, calls from our customers for a new septic system installation frequently leads to just repairs, that are much less expensive than a new system.

We've saved our customers thousands of dollars off the cost of a new septic system. Please contact us before considering replacing your septic system.

An Associated customer was told by others to replace their system for thousands of dollars. We quoted on a repair instead. The local sewer enforcement officer signed off on the repair which is working well. We are extremely skilled in this type of work.

Septic System Real Estate Inspections

An Associated Products Services septic real estate inspection can ensure the integrity of a septic system and provide you with the peace of mind that there are no issues that could cause you problems. We're proud to provide that peace of mind alongside our excellent customer service and highly qualified inspectors.

Our septic real estate inspection includes a full check of the septic system for any signs of malfunctions or problems.

The septic inspection begins with a cleaning and full check of the septic tank, including an inspection for any leaks or damage to the tank that would not allow the system to work properly. After the tank has been checked, we inspect the drain line between the home and the main tank for any blockages as well as the baffles for the outlet and inlet lines to ensure proper functioning. Once the septic tank system has been inspected, we probe the drainfield to ensure it is performing effectively.
